Spotless floors for winery chores

MCF-MONOLITHIC CERAMIC FLOORING

C-Guard® MCF is a concrete floor protection system made using special technology that ensures a uniform - monolithic composition of the floor throughout its entire volume and surface. It is made from environmentally friendly raw materials, does not contain solvents or benzyl alcohol, and therefore does not cause emissions.

Monolithic Ceramic Flooring (MCF) is the ideal choice for wine cellars due to its unique combination of properties that meet the requirements of the winemaking industry. Wine cellars are high-humidity environments where floors are often exposed to liquid spills, including chemicals and of course wine. MCF is a completely non-porous ceramic surface, meaning it does not absorb liquids and is resistant to acids and alkalis, but at the same time it is highly water vapour permeable surface, ensuring maximum protection and extremely long maintenance intervals.

MCF Floors - Spotless floors for winery chores

Zdravko Mastnak

Has transferred his passion for viticulture into a modern winery. His dedication to tradition and innovation is evident in every sip, delighting with unique freshness and elegance.

Orešje nad Sevnico 10, 8290 Sevnica

Mastnak – Frelih Winery

Located on the Krakovo estate near Sevnica, the winery has nurtured the tradition of producing premium wines for over 30 years. It boasts a rich selection of still and sparkling wines, with a special emphasis on Blue Franconian aged in oak barrels.

Orešje nad Sevnico 10, 8290 Sevnica

Antracit Nero

A combination of black and gray brings elegance and a modern touch, perfectly complementing any contemporary winery.

“Our floors truly do their job well – they are not slippery even when wet, and they seamlessly blend with our ambiance.”

- Zdravko Mastnak

Bogdan Dular

Together with his family, he continues a long-standing tradition of viticulture. His connection with nature and respect for the land are reflected in the exceptional harmony of flavors, offering a true sensory experience.

Kostanjek 20, 8272 Zdole

Dular Winery

Located in Kostanjek near Krško, the Dular family estate is surrounded by vineyards. They produce wines in an environmentally friendly manner, avoiding herbicides and chemicals, which is reflected in the quality of their wines.

Kostanjek 20, 8272 Zdole

Bianco Avorio

Soft ivory tones with touches of black and brown bring subtle elegance and light into every corner of your winery.

“Our flooring is now very easy to maintain. It beautifully complements our cellar while maintaining a natural look.”

- Bogdan Dular

Jure Grubar

Jure Grubar is the director and winemaker of the Krško Agricultural Cooperative, leading the revitalization of the largest winery in Posavje through modern technology, wine quality and expansion into domestic and international markets. He is particularly focused on producing selected aged and fresh sparkling wines, as well as premium still wines with the distinctive character of local varieties.

Roštoharjeva ulica 88, 8270 Krško

Krško Winery

Part of the Krško Agricultural Cooperative, known for producing premium wines, including the standout cviček PTP. With nearly a century of tradition, it combines a rich history with modern approaches in viticulture.

Roštoharjeva ulica 88, 8270 Krško

Antracit Oro

With a blend of black, gray, and gold, this flooring emphasizes prestige and adds a touch of luxury to the space.

“We are very satisfied with the collaboration. The floors are easy to maintain and Chemcolor found a solution for our daily challenges and needs.”

- Jure Grubar

Janko Kobal

Together with his wife, Andreja, Janko runs a family wine cellar where they combine tradition with modern approaches to viticulture. Their attention to detail and hard work are reflected in the perfect balance of flavors that exceed expectations.

Trnovec 12, 8292 Zabukovje

Kobal Winery

Located in Trnovec above Sevnica, the Kobal family lovingly produces premium wines. Special attention is given to Blue Franconian, which is grown on sandy and clay soils at an altitude of 360 to 380 meters.

Trnovec 12, 8292 Zabukovje

Terracota

The warm brick color embodies the spirit of the winery and emphasizes the authenticity and tradition of the viticultural environment.

“Our floors are so easy to maintain that we almost forget how important it is to have quality flooring that ensures hygiene and safety.”

- Janko Kobal

MCF Floors for Wineries

Decorative – Beautiful Appearance

MCF floors offer a seamless, smooth, and unified look, adding a modern aesthetic touch to the space. They come in a variety of colors and can be fully customized to match the winery's overall design.

Decorative – Adaptability to Winery's Identity

MCF systems offer a wide range of color shades and an aesthetically appealing appearance, allowing perfect alignment with the winery's identity. They are an excellent choice for enhancing a refined atmosphere.

Maintenance – Highly Resistant to Mechanical Damage

MCF floors are exceptionally durable and resistant to impact, scratches, and mechanical damage, making them ideal for high-traffic areas. They provide long-term protection without frequent repairs.

Maintenance – Easy Renovation

Renovating MCF floors is simple and economical. Only minor surface preparation, such as cleaning or polishing, is required to maintain their beautiful appearance. Minor damage can be repaired easily and quickly.

Safety – Non-Slip When Wet

MCF floors ensure a high level of safety with their non-slip surface, reducing the risk of falls and accidents. They are ideal for spaces requiring enhanced safety.

Safety – Non-Flammable

In the event of a fire, MCF systems do not support flame spread and minimally contribute to smoke production. This ensures a high level of fire safety and compliance with European safety standards.

MCF Floors - Spotless floors for winery chores

Safety – Free of Harmful Emissions

MCF systems are free from volatile organic compounds (VOCs), plasticizers, or benzyl alcohol. They are environmentally and user-friendly, meeting the strictest health and safety standards.

Hygiene – Mold-Free Surfaces

MCF floors are designed to prevent mold and microbial growth. Their smooth, seamless surface prevents moisture retention, ensuring a hygienic environment.

Hygiene – Easy Cleaning

The seamless and smooth surface of MCF floors allows for quick and easy cleaning. Dirt and stains are easily removed, enabling low maintenance costs and maintaining a clean appearance.
